

Tapered ring adjustable, for flange connection, PN 16

8150

Application

- To correct erroneous angles in flange connections.

Characteristics

- Angular offset can be progressively tilted from 0° to 8°.

Material

- nach DIN EN 1514-1
- EPDM
- Shore A Härte 70 ±5
- mit Stahleinlage (Nr. 8200)

Installation and assembly

- It does not require additional seal.
