

Petrol engine for tapping unit

8341

Application

- In connection with the tapping unit with automatic feed
- For a quick and trouble-free tapping under pressure of steel and cast pipes with or without a cement coating

Characteristics

- Efficient tapping is guaranteed by the aligned speed of the petrol engine.
- The petrol engine runs in a vertical and horizontal position.
- 2-stroke petrol engine
- Petrol mixture 1:50
- Incl. transport case

Caution

- Special milling cutters are used for cement-coated pipes, which must have a motor drive with automatic feed.
- Do not use in gas pipelines because of the risk of explosion.
