

Compressed air motor for tapping unit**8342****Application**

- In connection with the tapping unit with automatic feed
- For a quick and trouble-free tapping under pressure of steel and cast pipes with or without a cement coating

Characteristics

- Efficient tapping is guaranteed by the aligned speed of the compressed air engine.
- Air consumption 540 l/min

Caution

- Special milling cutters are used for cement-coated pipes, which must have a motor drive with automatic feed.
